DESIGNING SERVICES

Customized dental designs to fit your unique needs, only at Global Dental Designing .

Surgical Guide Design

Our surgical guide design service utilizes advanced digital technology to create precise and accurate guides for dental implant surgery. With our high-quality designs, dentists can achieve optimal results and improve patient outcomes.

Crown Design

Our crown design service is top-notch and utilizes advanced digital technology to create high-quality and precise designs for dental crowns.

Implant Crown Design

Our implant crown design service is unparalleled in quality and precision. We use the latest digital technology to create custom-made implant crowns that fit perfectly and look natural. Our team of experts pays close attention to detail, ensuring that each design is unique and tailored to the individual patient.

IMPLANT DIRECT™

LEGACY 4

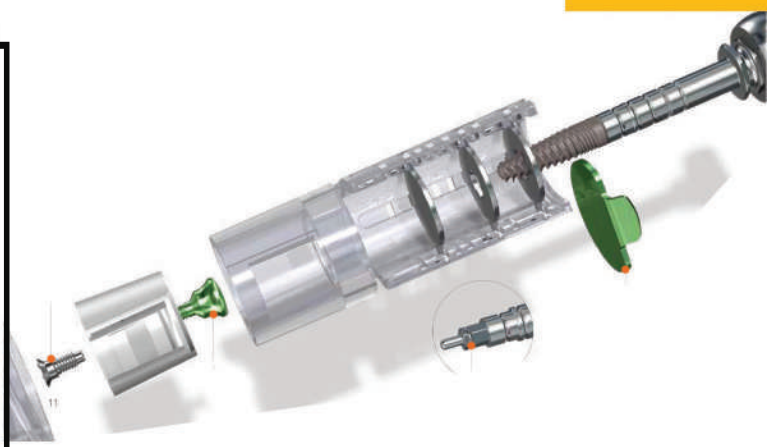

INTERNAL HEX

Legacy Implants feature quadruple-lead micro-threads on the coronal aspect designed to increase bone-implant contact and long-term stability in the crestal bone area. Legacy2, 3, and 4 feature progressively deeper buttress threads on the implant body to improve primary stability in low-density bone. Legacy implants allow for both immediate placement or delayed placement and function to support single tooth or multiple tooth restorations, recognizing bone stability and appropriate occlusal load requirements. With surgical versatility and restorative ease, Legacy allows you to deliver a high standard of patient care routinely.

Powerbone Barrier Membrane

Coricama is tradition and Italian style where technology and design blend together in a refined combination to create a selection of efficient, handy and elegant instruments.

Our goal is to achieve the highest standards in terms of beauty, ergonomics and handiness of the instruments: the aesthetic research by Coricama along with the functional and structural aspects, make the product a high-quality working tool.

Performance for Coricama is to ensure that the instrument adapt perfectly to the dentist's hand sensitivity, so to contribute to the patient's well-being.

PENTRON

RESTORATIVE SOLUTIONS

Professional dental procedures are at the heart of your practice. Everything has to work together to complete your day successfully. At Pentron we are always looking for techniques and solutions to assist you in overcoming the challenges that complex, repetitive or new procedures may bring you.

PENTRON introduced our original flowable composite, total etch bonding system, and a line of impression material that has remained popular to this day. More recent introductions have included veneer cement, liquid dentin, solvent free SE adhesive, core build up material and posts. Every day, we look forward to what's coming next.

Dentsply Sirona

HANDPIECES & SCALER

Ditributor For
AMANA Co.

See everything you want to see with nearly no limits. With Energo we provide you an electric handpiece with a smaller head and improved handshape for excellent sight and precise work.

- Improved fiber-optic glass enhances illumination up to 40 kLux for a brighter work area (approximately 34 % transmission improvement)
- Smaller head with increased bur protrusion for improved access to deeper preps

Stress-free working – reduced noise
Optimized access and improved view – Simplified handling
High safety – Sustainable – reduced carbon footprint

The SiroSonic/SiroSonic L and SiroSonic TL ultrasonic handpieces with powerful illumination are the perfect instruments for many types of treatment in the modern dental practice. Their reliable power regulator allows them to be used both for highly sensitive periodontal treatments and micropreparation. A Dentsply Sirona spray adapter can also be attached to the handpieces for delivery of external rinsing fluid (e.g. NaOCl or CHX solution)
